# THE SOUTERROSCOPE

SAINT-VALLIER-DE-THIEY

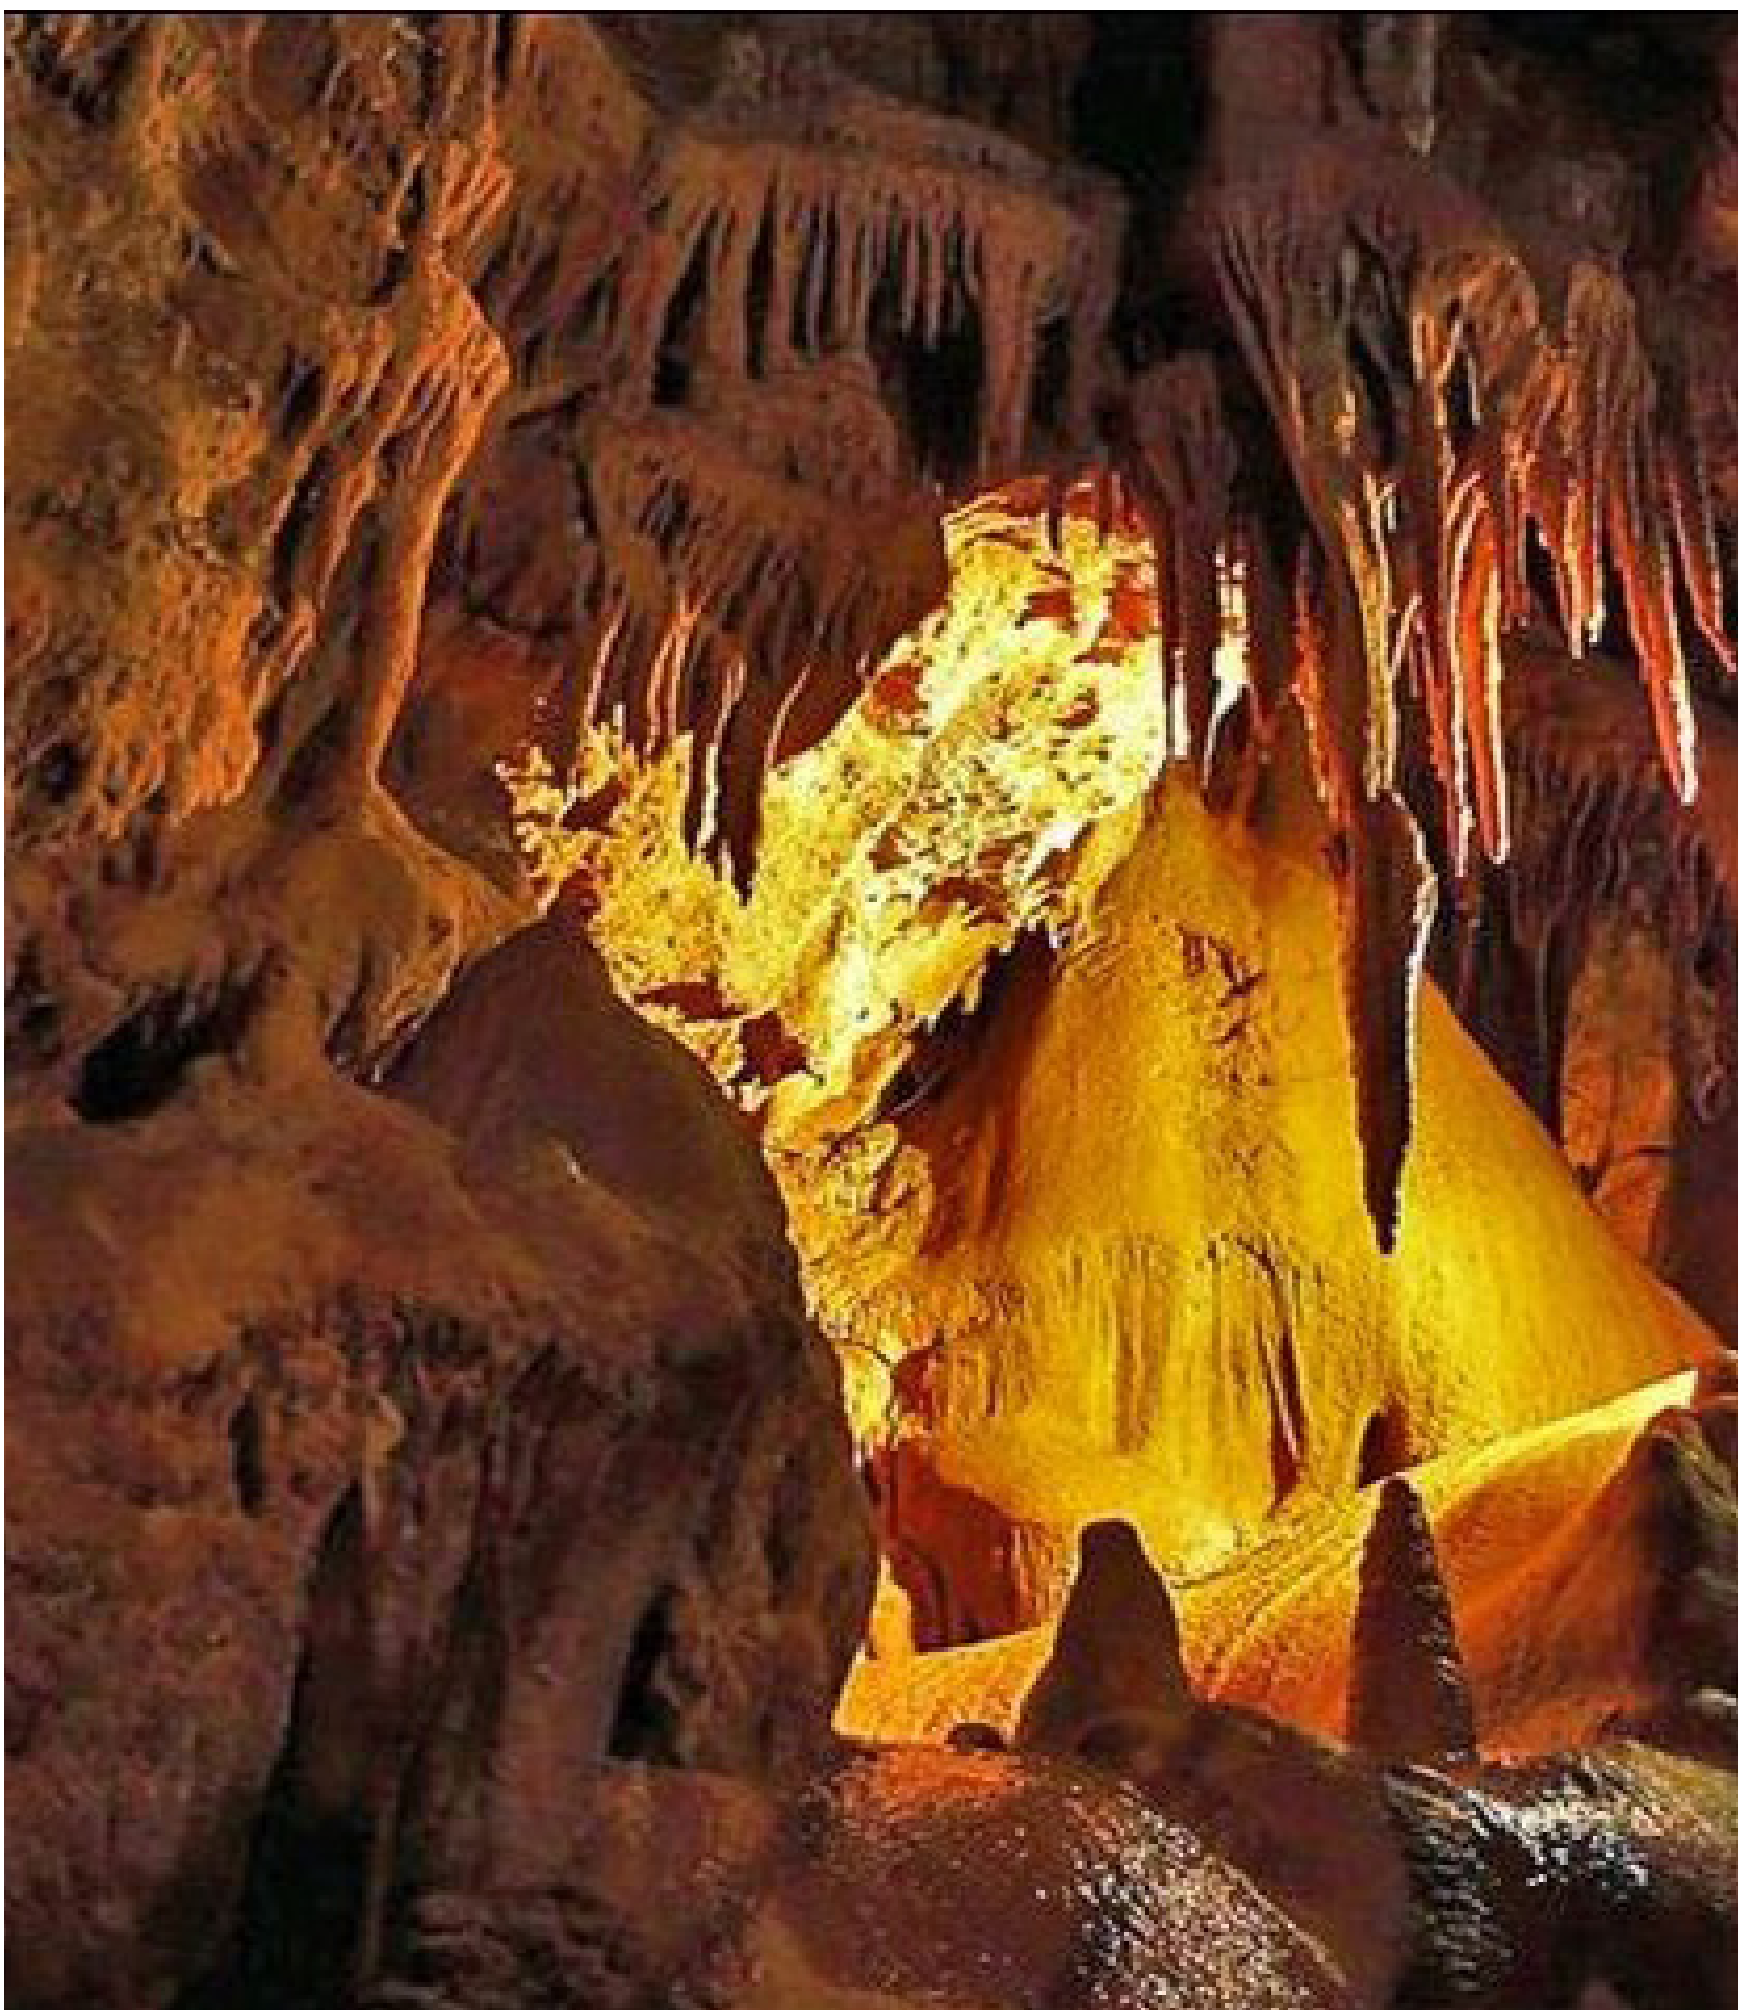

# Cave of the Prealps

In the heart of the Regional Natural Park of the Préalpes d'Azur, the cave makes you discover the wonders of the underground world. In addition to the beauty of its course, the surface part is full of secrets. Located in a protected natural park, the site is home to a wide variety of flora and fauna. A historical and cultural heritage is to be discovered with the troglodyte sites, the dolmens, the burial mounds, the chapel, the old bridge or the mill.

# A gem underground

The underground course of the cave extends over 700 meters and 60 meters deep. It lasts about 45 minutes and allows you to discover a set of underground rooms, stalactites, stalagmites, calcite waterfalls and other formations. spectacular geology. There are also underground lakes and an underground river.

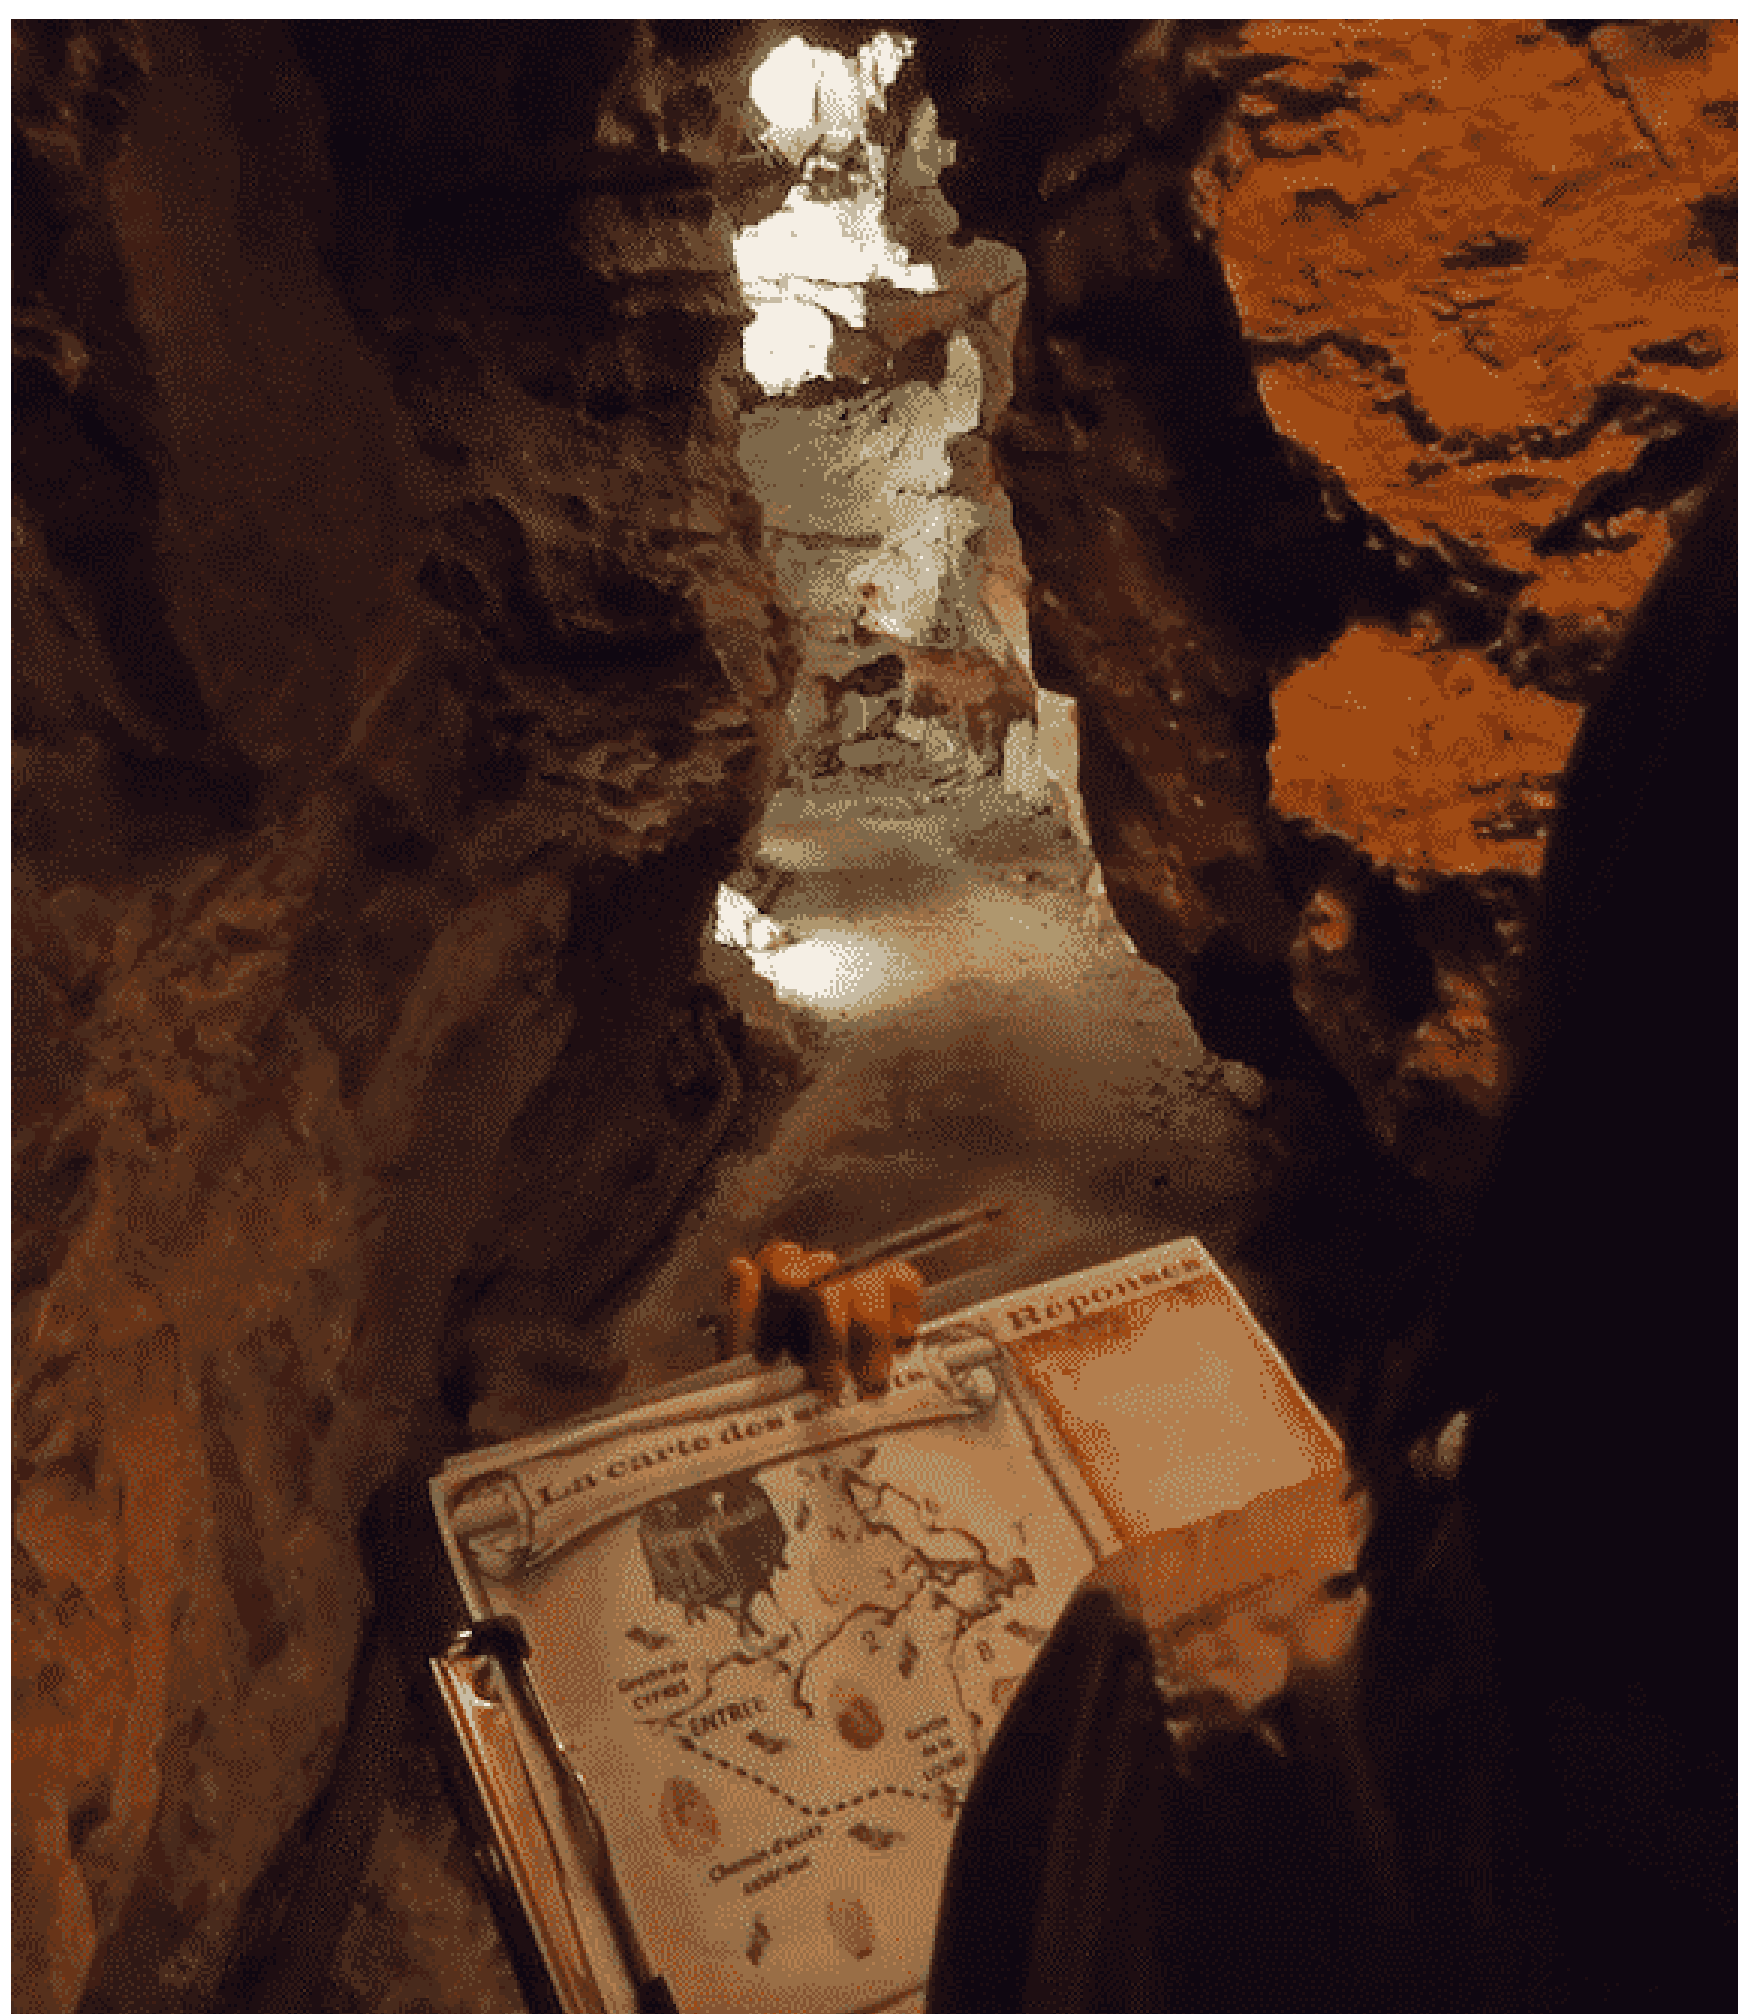

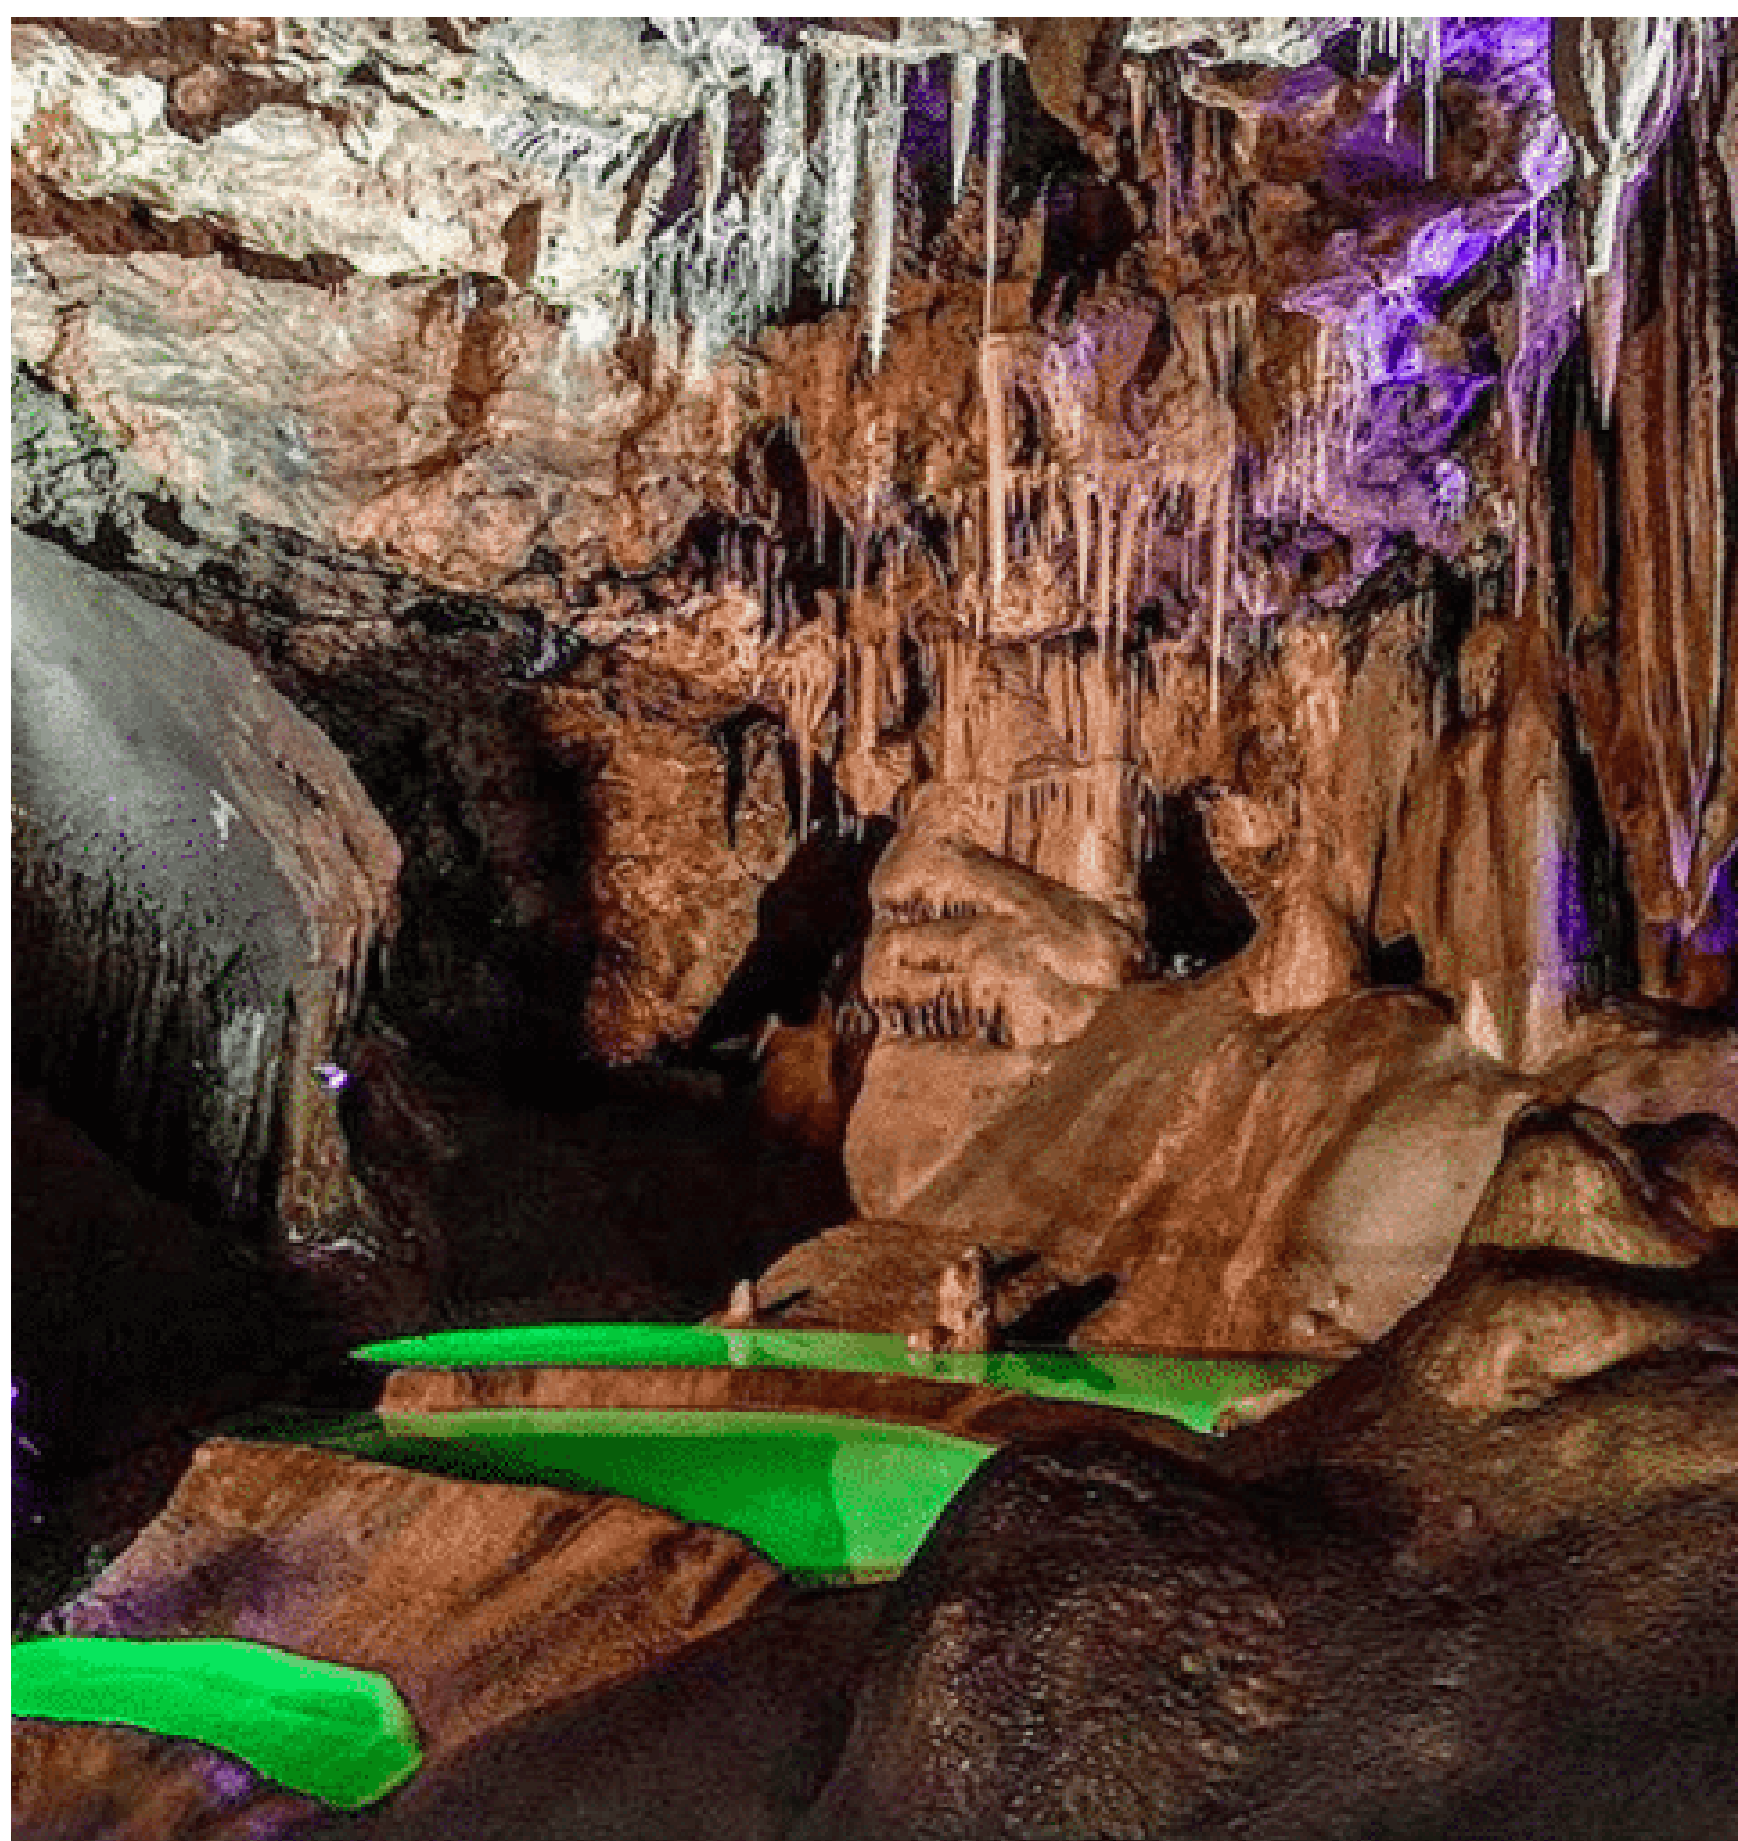

# THE SOUTERROSCOPE

If you are passionate about the wonders of the underground world or if you are simply looking for an original activity to do in the region, the Souterroscope of Saint-Vallier-de-Thiery is a visit not to be missed.

**THE RIVIERA LEISURE TEAM**

## The suberroscope sound and light show

The Souterroscope is a sound, image and light show. So it's to the rhythm of the music, songs and comments (in French German, English or Italian) than hundreds of projectors turn on and off throughout the course to create another dimension, magical and poetic.

## Educational visits and fun

At “Baume Obscure”, it is also possible to make fun, recreational and educational visits to spend pleasant moments with family or friends. This is how free visits (without a guide) and visits combined with “treasure hunt” type games make Baume Obscure special. This activity combines discovery, learning and fun. An edition of the treasure hunt in the forest is available.

# Guided tours with a speleologist

For fans of guided tours, the cave offers the services of a speleologist or a naturalist to discover the site of Baume Obscure from the most varied angles, both on the surface and underground: history of the discovery and cave layout, fauna and flora, geology, hydrology, minerals and fossils, bats and cave life.

# Schedule

The Souterroscope is open from early February to mid-November. The park opens at 10 a.m.
